GLOBAL SOURCING & TRACKING

A powerful new way to manage and control your international supply chain

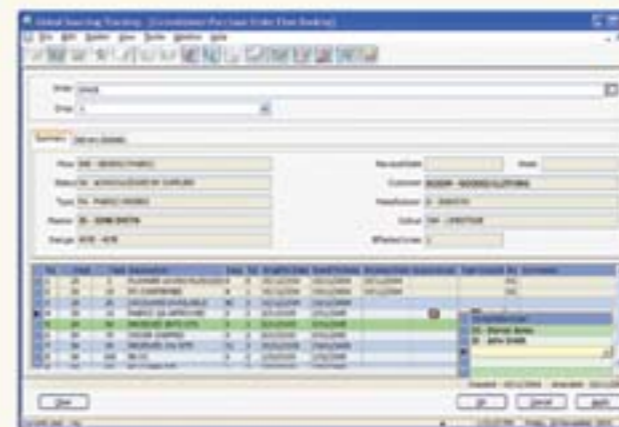

GLOBAL SOURCING & TRACKING FEATURES

- Online synchronisation between supply chain partners
- Work flow control
- Flexible product configuration
- Secure (encrypted) data interchange via Internet
- Configurable data interchange
- Integration to existing production control applications
- Correspondence Tracking
- Authorisation controls built in
- Event tracking (Exception/Completion/Activation)
- 'Watch/Critical' flags
- Integrated Planning Tools
- SSCC/SCM remote label production

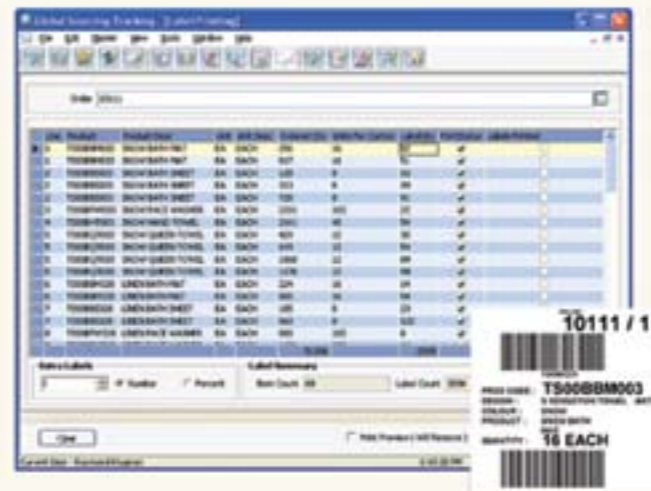

CRITICAL PATH

The sequence and timing of the production process, when declared in the system, can then be monitored and managed via on-line reporting or enquiry screens.

TRACK ANY PRODUCT

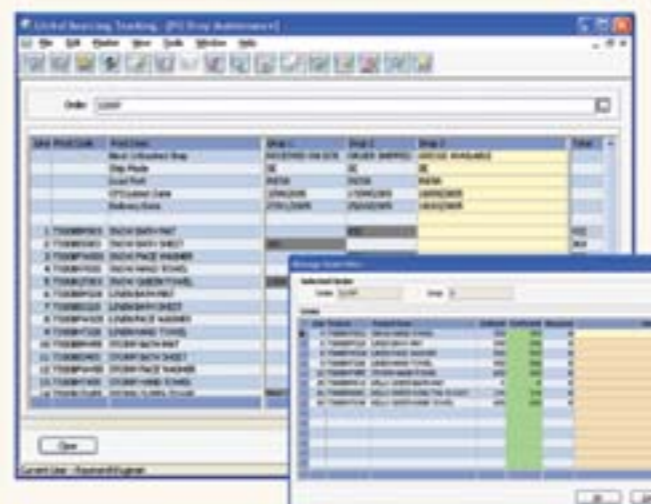

From BEDLINEN to BRAS, SHIRTS to SKIRTS, production can be tracked and managed at multiple factories across the entire supply chain.

CARTON SHIPPING LABELS

Production of Carton Shipping Labels at Manufacturing Source enable efficient tracking and DC receipting.

Scanned verification upon receipt detailing Carton Contents.

MANAGE DELIVERY DROPS

Purchase Orders can be Split onto separated drops as production/sourcing issues arise.

Controlling Purchase Orders at the Delivery Drops level allows for independent Drop tracking to delivery.
